## ORGANIZATION OF THIS DOCUMENT

The authorized resource lists for Knowledge and Employability courses are organized by subject/occupational strand. The lists are organized as follows:

### **Authorized Resources Listed by Subject (Grades 8–12)**

Student Basic Resources are listed alphabetically within each grade, followed by Student Support Resources and Teaching Resources. Each entry provides the following information:

- series name (if applicable)
- title of resource
- authorization category (student basic, student support, teaching)
- grades authorized for
- vendor/distributor name, order number and price
- other Knowledge and Employability subjects authorized for (if any).

### **Annotated Bibliography Listed Alphabetically by Title**

Each of the resources listed has a corresponding annotation. Each annotation page identifies the:

- series name (if applicable)
- title of resource
- type of resource—the annotation has an icon of the type of the resource (e.g., print, video, CD-ROM)
- authorization category (student basic, student support, teaching)
- grades authorized for
- subjects authorized for
- vendor/distributor name, order number and price.

# RESOURCE AUTHORIZATION CATEGORIES

## Knowledge and Employability Resources

The resource lists for Knowledge and Employability courses contain learning and teaching resources that have been authorized for use in Alberta schools.

Alberta Education selects and authorizes resources to support the implementation of programs of study. Teachers are encouraged to select resources that meet the diverse learning needs of students they teach. The resource authorization categories are **student basic**, **student support** or **teaching**:

**Student Basic** learning resources are those student learning resources authorized by Alberta Education as the most appropriate for addressing the majority of outcomes of the course(s) or substantial components of the course(s); or the most appropriate for meeting general outcomes across two or more grade levels.

**Student Support** learning resources are those student learning resources authorized by Alberta Education to assist in addressing some of the outcomes of the course(s) or components of the course(s); or to assist in meeting the outcomes across two or more grade levels.

**Teaching** resources are those teaching resources identified as the best available resources to support the implementation of programs of study and courses; they may be teacher guides to accompany student resources or teacher professional resources. The authorized teaching guides are listed with the student resources.

These resources are organized by grade, authorization status and title in alphabetical order. Series names are italicized. Grade level(s) are indicated beside each title and there is a cross-reference column to other Knowledge and Employability subjects on the right side of the page.

### Note:

Alberta Education strongly recommends that teachers read all selections in the student resources and all activities in the teacher guides prior to using them with students. Careful consideration should be given to the sensitivities of both the student audience and the community, and to the reading levels of students.

This resource consists of a book, CD-ROM and instructor's guide. The CD-ROM has four specific games that take into account all aspects of the Agriculture 20-4 and 30-4 strands.

The ten units in this resource address topics within natural resource management, forestry, agriculture and horticulture. It focuses on plant and crop science, and pest control with an emphasis on production and management. Areas such as animal science look at the care and management of small and large animals from genetics, breeding and reproduction. There is an emphasis on chemical safety that reinforces safety in the workplace. Text is accompanied by colourful illustrations. Each chapter features an introduction of student objectives and key terms; it includes a chapter review with questions for discussion and highlights related careers. The resource includes a glossary.

The instructor's manual provides definitions for terms in each unit together with suggested class activities and keys to the self-evaluation sections within the book. A lab manual is also available.

**Comments:**

- This resource was developed in the United States and teachers will need to supplement the resource with Canadian content.
- The language level may prove to be challenging for some Knowledge and Employability students.

This resource kit includes a hardcover student text, a teacher resource guide, a series of lab softcover books, a student motivation kit that includes laminated project and activity cards, reteaching and enrichment activities, and a CD-ROM with lesson plans and a test generator. There is a student workbook and a teacher annotated edition of the student workbook. Subjects include sewing, foods, personal development and career integration; e.g., money management for mathematics. Transition activities for students going into senior high school, e.g., peer pressure, self-actualization, self-concept, are included. The CD-ROM is easily accessible and includes a Word document copy of the student workbook and the teacher guide. An exam bank provides a very quick way to create a test. Posters for motivation in each area are engaging and the individual area teacher support books are well-organized and informative; e.g., the cooking component offers recipes applicable to the age group with clear instruction.

**Comments:**

- This resource is applicable to grades 8 and 9. Individual units and visuals may be appropriate at different grades.
- The kit is a starting point for new Knowledge and Employability students.
- Some of the student pictures are more appropriate for younger grades, yet others show senior high school students. Teachers should be sensitive to age-appropriate sections.

This resource deals with soil preparation for plants, planting procedures, turf and grasses, and landscaping techniques. There are descriptions and photographs of plant science, vegetable and fruit gardening, and plant propagation. The occupational focus of this textbook is to look at the skills needed to manage greenhouses, crops and pests. The resource provides scientific and common names of various plants, and also deals with maintenance of tools and equipment.

**Comments:**

- The resource has a strong American bias.
- The readability level is high for a Knowledge and Employability student.

The Knowledge and Employability Studio is the online guide to implementation for the Knowledge and Employability courses. There are four levels in the Studio. The Main Lobby contains program updates, contact information, a video introduction and a virtual tour of the Studio. New update information is displayed on the screen in the lobby. Curriculum Foundations, found on Level 2, contains activities and strategies to support teachers and students with the implementation of four core subjects: English language arts, social studies, science and mathematics. Click on the title of the course for further information. Within each subject are folders that contain resources aligned with the program of studies outcomes within that subject area. Level 3 contains information on each of the occupational strands. Poster-like artwork displays the names of each strand. In the same manner as the second level, each icon, when opened, illustrates a collection of activities and strategies aligned with the program of studies outcomes within each occupational strand. Workstations for administrators, teachers, students, parents and industry are found on Level 4. The folders and resources function in the same manner as the other levels but reveal learning and teaching resources to support teachers, students and parents. The Administrators Workstation contains the *Information Manual for Knowledge and Employability Courses*. The Industry Workstation contains information for employers working with students in off-campus situations.

*Read to Live* provides information, strategies and activities that teachers can use to engage and support students who are experiencing difficulties with reading. The focus is on helping students think about reading in a new way by connecting classroom experiences with students' lifeworlds. This resource, which is a series of workshops to enhance student literacy at the junior and senior high school levels, is intended for teachers who are new to teaching, new to teaching students with reading difficulties or just looking for extra support. It can also be used by more experienced teachers to mentor colleagues and create a community of practice.

The first workshop, **Introduction: Responsive Teaching**, describes an approach to teaching reading that focuses on addressing students' unique learning needs. This is followed by three more in-depth workshops, which explore different elements of reading: **Contexts of Reading**, **Active Reading** and **Multiple Texts/Multiple Literacies**. Each of these workshops contains three sections: Background, Reading Strategies and Teaching Strategies. The workshops can be explored in multiple sittings, in whatever way is most useful. Teachers can explore the information in any order; however, teachers new to teaching reading or to the concepts covered may find it most useful to start with the Background.

**Background**

The background section summarizes important concepts, research findings and other information on the topic. Links provide further information on relevant theorists and researchers.

**Reading Strategies**

The reading strategies section offers sample strategies teachers can model, teach and reinforce to help students become more effective readers. These strategies apply and build on the concepts in the background section.

**Teaching Strategies**

The teaching strategies section provides sample instructional strategies and activities teachers can use to strengthen students' understanding and motivation.

This teacher resource, fifth in the series, addresses units on Health and Lifestyle, Safety Management and Procedures, and Personal and Workplace Safety. Each unit presents relevant information followed by formative and summative student exercises. The handouts provided are ready to use and adequately assess the goals of the manual. Safety applications are related to the students through scenarios in the home, school and workplace. The section on compensation is accurate in Alberta. First aid is not addressed in this manual; references are made to the importance of acquiring these skills in an approved program. This resource is intended for the Career Development, Safety and Universal Strategies occupations modules, but could be applied successfully to health and science.

**Comments:**

- The student assignments are effective but no scoring rubrics or answer keys are provided.
- Some written assignments may need to be restructured for less capable learners.

*Today's Teen* resource package includes a hardcover student text, a student workbook, a teacher resource guide, a CD-ROM, a transparency package, a hardcover teacher edition, and a student workbook annotated teacher edition. The resource promotes success in everyday living and the text and worksheets are complementary. There are eleven units in the text including: building personal potential, exploring careers, relationship skills, friend and family relationships, children, consumer/money management, personal health and wellness, food and nutrition, safety in the kitchen, clothing, and housing interiors. The resource presents information clearly and with simple illustrations. *Today's Teen* could be used as a cross grade resource using specific chapters at certain grade levels. Teacher package gives options, suggested time spans for teachers, is well organized and teachers can use with "minimal" preparation. The teacher's guide has an overview, curriculum correlation chart, planning chart, section on accommodating various learning styles, section on additional activities and student activities. The teacher answer help provided a variety of assessment tools such as crosswords, short answer, and word searches. The test bank was easy to modify; multimedia use is provided.

**Comments:**

- An American book using American agencies, resources and measurements which would need to be replaced with names of Alberta organizations etc.
- There is nothing included for record keeping in the package.
- The Career Exploration was generally unrealistic at Knowledge and Employability achievement levels. Construction skills focused on sewing at an advanced level.

*What Everyone Should Know About Toxicology* is a live action video designed to help people understand the types of toxic materials found around the workplace and their effects. The program reviews the basic terminology used in the field of toxicology and covers the differences between point of contact and remote side effects of toxic materials and between immediate and delayed effects. The program also describes hazards of different classes of materials and includes guidelines for minimizing exposure to toxic or hazardous materials. It should be recognized that this audiovisual program is only one part of a comprehensive training program understanding the range and effects of toxic materials. For optimum results, this presentation should be supplemented with a review of the types of protective equipment to be used around specific types of materials. Measures have been taken to ensure that the information contained in the program and this Leader's Guide is accurate and reliable. However, since information on exposure levels, specific chemicals and protective equipment may vary depending on the work to be done and particular local policies, the training session leader should take this into consideration when presenting this program.

The *Workplace Health and Safety Teacher Resource Binders* and *Teacher Toolkit* were developed as a joint initiative by Alberta Education and Alberta Human Resources and Employment to support teachers in the delivery of workplace health and safety outcomes. The resource actively promotes the safety of all workers in Alberta, particularly young workers, and documents Alberta health and safety legislation and regulations. Students will become aware of their rights and responsibilities with respect to workplace health and safety concerns.

The two-binder set of workplace health and safety information is divided into seven chapters: legislation, health and safety management systems, physical hazards, chemical hazards, biological hazards, psychosocial hazards and ergonomics. Each chapter includes topic-specific content that is followed by a supplemental information section with course-specific, industry-specific or occupation-specific information. Teacher notes, handouts, overheads and additional resources are also included with each chapter. The accompanying *Workplace Health and Safety Teacher Toolkit* complements the resource binders with posters, publications, cards and CDs. The toolkit is organized into nine sections: statistics, videos, posters, cards, publications, general, employment and standards information, workers' compensation information and other.

**Comments:**

- This resource has the potential for transfer to any school or workplace setting.
- The resource contains reference to a workplace fatality (page 12 of the legislation section) that was widely reported in the Alberta media. Teacher judgement is advised in the use of this reference as students who knew the deceased or were related to him might be in the classroom.
